Discussion outline

President

- The Board discussed the current situation with the Nomination process given the lack of nominations and submissions had during the last call. A blog post written by some volunteers has been used as a starting point to develop the topic and find out some solutions that can improve the current process.
- **Officially define board roles and associated commitments.**
  It has become clear that board roles lack definition, giving potential candidates very little idea of the scope and commitment of the role up for election. We are implementing the following solution to this with a deadline of the end of September 2019 for publication.
  - Each Department Coordinator and Officer will create a document containing a description of their role, the related duties and responsibilities, alongside estimated time commitments.
  - The current serving DC/Officer will be responsible for reviewing and updating (where necessary) this every year in the last quarter of their term to ensure that it reflects their current role, duties and required time commitments. This will allow potential candidates in the upcoming elections to have a clear picture of the role before they consider running for it.
- **Require quarterly reporting of progress made and plans for next quarter from all DC's and Officers.**
  Implementing quarterly reporting for all Board Members will allow potential candidates to see how the department has been performing in recent months alongside a roadmap for the next quarter. We are implementing the following solution to this with a deadline of the end of September 2019 for the first publication.
From this point onwards, all DC’s and Officers will be required to publish a report within 14 days of the end of each 90 day period they are in office. This will help with more than just the election cycle this will also help to provide transparency, continuity and historical reference throughout the project.

- Books handed over to Danielle, we work in cash accounting, so suggest adding those items that were for last year as budget lines to zero them out in year. For accounting purposes these show as liabilities on the balance sheet, but the payments will show in this year’s budget.
- All transactions this year are up to date. Need to address point above and then load this year's budget into quickbooks.
